one of the more exciting realities of 21st century life is that objects are now able with the help of embedded technology to sense think act and communicate very soon every building city and landscape component will be equipped with communicative and computational capacities we shall be surrounded by sentient architecture this book documents the role

of architecture in shaping this new reality in multiple research trajectories launched and guided by the authors at the university of toronto mit harvard graduate school of design and the university of hong kong the projects establish an interdisciplinary platform involving artists designers scientists and engineers spanning different institutions and continents in a technological approach to spatial problems that is attuned to the dynamics of living systems

buildings are increasingly dynamic equipped with sensors actuators and controllers they self adjust in response to changes in the external and internal environments and patterns of use building dynamics asks how this change manifests itself and what it means for architecture as buildings weather programs change envelopes adapt interiors are reconfigured systems replaced contributors including chuck hoberman robert kronenburg david leatherbarrow kas oosterhuis enric ruiz geli and many others explore the changes buildings undergo and the scale and speed at which these occur examining which changes are necessary useful desirable and possible the first book to offer a coherent comprehensive approach to this topic it draws together arguments previously only available in scattered form featuring the latest technologies and design approaches used in contemporary practice the editors provide numerous examples of cutting edge work from leading designers and engineering firms working today an essential text for students taking design studio classes or courses in theory or technology at any level as well as professionals interested in the latest mechatronic technologies and design techniques

albert einstein said we can't solve problems by using the same kind of thinking we used when we created them if we don't have the kinds of health and human services or even the kinds of lives communities and organisations we want then we need to think differently yoland wadsworth offers an inspired insight and radically new proposition that the act of our inquiring of researching and evaluating together is the way by which every living organism and all collective human life goes about continuously achieving the conditions for life building in research and evaluation explores this new approach for bringing about both wanted change and stability by inquiring around whole cycles of acting observing questioning feeling reflecting thinking planning and acting again yoland identifies how new life might be brought to what we do sound and persuasive insightful important and inviting a great contribution michael quinn patton author of the best selling book utilization focused evaluation brilliant i'm not aware of any other book of this nature the examples are impressive linette hawkins social work educator i remain critical of systems models and biological analogies for organisational processes but this work is unquestionably original and in major ways innovative raewyn connell sociology professor highly original an ambitious integration of concepts credible and useful grounded in pioneering empirical research danny burns professor of organisational learning

encyclopedia of sustainable technologies eight volume set provides an authoritative assessment of the sustainable technologies that are currently available or in development sustainable technology includes the scientific understanding development and application of a wide range of technologies and processes and their environmental implications systems and lifecycle analyses of energy systems environmental management agriculture manufacturing and digital technologies provide a comprehensive method for understanding the full sustainability of processes in addition the development of clean processes through green chemistry and engineering techniques are also described the book is the first multi volume reference work to employ both life cycle analysis lca and triple bottom line tbl approaches to assessing the wide range of technologies available and their impact upon the world both approaches are long established and widely recognized playing a key role in the organizing principles of this valuable work provides readers with a one stop guide to the most current research in the field presents a grounding of the fundamentals of the field of sustainable technologies written by international leaders in the field offering comprehensive coverage of the field and a consistent high quality scientific standard includes the life cycle analysis and triple bottom line approaches to help users understand and assess sustainable technologies

building the strategically responsive organization edited by howard thomas and don o neal university of illinois usa and rod white and david hurst western business school ontario canada the contributions in this volume provide an interesting and effective integration of strategic perspectives that exemplify many of the most important issues facing strategic management both now and in the immediate future education strategic intent competitive dynamics industry evolution strategic change value chains globalization building the strategically responsive organization is concerned with building and maintaining bridges between theory and practice on the research side it generates and tests theories related to business and management and on the practitioner side it shows how to learn understand and apply tested theories to practice

the work of the pioneering figure in british high tech architecture
